EXPERIENCE

Frontend developer, Angular single-page app 2025 – present
Build features, integrate micro frontends, run frontend releases through the pipeline and tighten loose acceptance criteria with the client.

Fullstack developer, web and mobile 2024 – 2025
Shipped a Next.js web app and a React Native app in TypeScript, with GraphQL resolvers and REST endpoints in Node.

PROJECTS

Nova Stream React, Express, Redis
One search box for films, series, music, books and games, with an Express API in front of five content providers.

SimLab JavaScript, Canvas
Physics and generative simulations with no build step and no dependencies.

MedFlow React, TypeScript
Hospital operations dashboard with six roles and four languages, driven by one resource configuration.

TedDex React, TypeScript, IndexedDB
Installable Pokédex and team builder that works offline: 1,025 species served as static data, cached by a service worker, covered by 500+ tests.

EDUCATION

Master's Degree in Electrical and Computer Engineering 2022 – 2024
Instituto Superior Técnico. Main area: Control Systems, Robotics and AI.

Dissertation: Visual SLAM and Camera Autocalibration for Autonomous Cars Navigation, in the **VIENA Project**. Implemented camera systems and object detection for ground truth acquisition and distractor removal in VSLAM.

Bachelor's Degree in Electrical and Computer Engineering 2019 – 2022
Instituto Superior Técnico

SKILLS

Every day	TypeScript, Angular, React, HTML, CSS, Git
Shipped with	Next.js, React Native, Expo, Redux, GraphQL, REST, Node, Jest
Also	Python, C, MATLAB, LaTeX
Languages	Portuguese (native), English

WORKSHOPS

- *Uncomplicating AI*, Cloudflare at SINFO 31 (2024)
- Git workshop, NEECIST (2022)
- Soldering workshop, NEECIST (2022)
